seiu.org

SEIU is a union of 2 million members and workers across healthcare, the public sector, and property services who fight for a just society where all workers are valued and all people are respected.

SEIU

Service Employees International Union (SEIU), a U.S. labor union representing more than 2 million members and workers, harnessed mCommons to expand their digital engagement strategy. Addressing their goals of growing their membership and empowering member-legislator communications, mCommons fueled an impressive addition of 15,000 members in a year. Additionally, features like mConnect and mData enhanced legislative interactions, driving 27,000 calls and guiding voters to polling stations, crucially impacting the 2020 elections.

How do you transform passion into action, connecting union members directly with their legislators and polling places?

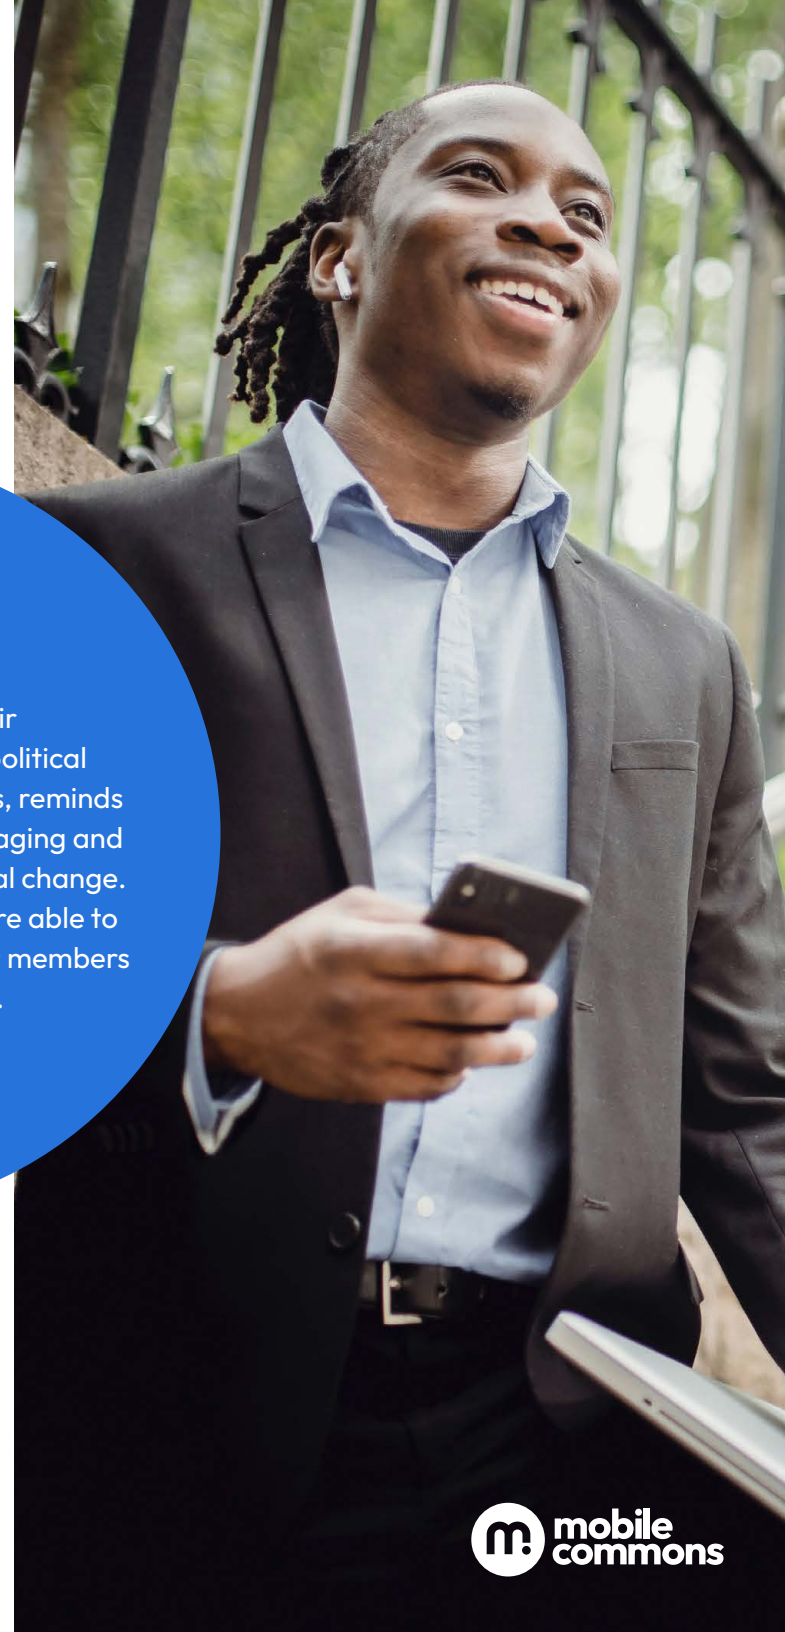

SEIU needed a way to connect with and empower their subscribers in the digital age

SEIU's vision is big, and they needed a solution just as grand. In an era where everything is going digital, SEIU needed to keep growing their subscriber list. They aimed for a seamless integration of webforms (think petitions and sign-ups) from websites, social media, and emails. The goal? Every new name and every fresh subscription are automatically synced to a platform and is welcomed into the SEIU family. SEIU also wanted to empower its members to voice their concerns directly to local legislators and elected officials. Moreover, their boots-on-the-ground approach to getting out the vote needed a technological ally. The mission? Simplify the voting process by seamlessly guiding members to their nearest polling locations.

The mCommons team engages as a true strategic partner

As a leader in labor union text messaging, the mCommons team joined forces with SEIU to create detailed campaigns and plans. Our blend of technical gurus and experienced labor strategists rolled up their sleeves, setting up weekly strategy sessions to brainstorm fresh ideas, walk through the latest technology options, and answer questions along the way.

SEIU's success in growing their membership and mobilizing their members and workers to take political action, powered by mCommons, reminds us of the power of mobile messaging and the potential it has to inspire real change. By utilizing technology, they were able to have a massive impact for their members and workers across the country.

SEIU harnesses mCommons to create meaningful legislative change nationwide

Expanding membership via targeted text messaging campaigns

Over the first year working together, SEIU saw an impressive addition of 15,000 members, driven by mCommons text messaging outreach. Every single one of these new members got their first taste of SEIU power with the latest news, campaigns, and union chatter via mCommons. And to keep new members engaged, our platform ensured that new members received a steady drip of messages over the first month, keeping them connected and fired up.

Creating significant legislative impact with mConnect and mData

SEIU also adopted two of mCommons' gamechanging features that drove massive success: mConnect and mData. mConnect, our auto-dialing feature, played a pivotal role in driving phone calls on essential federal

legislation like the PRO ACT and Build Back Better. Campaigns including 'Airport Workers United' and another championing the Build Back Better legislation drove 27,000 calls by union members who were sent a text message and then instantly connected with their legislators.

Utilizing mData, our polling locator tool, SEIU guided members and workers to their nearest polling location, ensuring they cast their votes for pro-union candidates. The results speak for themselves, with thousands interacting and facilitating the election of a pro-union Senate and President in 2020.

Remarkable success in crucial swing states

Unions like SEIU didn't just participate in the 2020 election; they carved a path to a pro worker presidency! A strategic blend of on-ground volunteers and tech-driven

mobilization via mCommons had SEIU dispatching almost 1,200 volunteers across the critical swing states of Pennsylvania, Arizona, and Nevada. This wasn't just a drive; it was a thunderous statement—marking the largest grassroots canvassing program in these states. This union-driven, dual-faceted approach combined grassroots canvassing with individuals whose views aligned with union values, even if they weren't union members themselves, leading to incredible results. In states like Nevada and Arizona, the number of these voters exceeded Biden's margin of victory. According to Pennsylvania's exit polls, canvassing workingclass neighborhoods in that state made a tangible impact, propelling Biden towards victory.
